

# Permatex® tech tips

## Do you have the Right Stuff®?

The Right Stuff® is an elastomeric instant rubber gasket maker that fits many different applications quickly and easily.

- Formulated in partnership with GM, Ford and DaimlerChrysler to meet or beat OEM performance specifications. Used in these automakers' service parts programs.
- Instantly makes gaskets that are more reliable and longer lasting than cut gaskets at a fraction of the cost.
- Protects against leaks caused by vibration and thermal expansion.

Evolving engine designs have driven many gasketing challenges. Materials like bi-metal alloys, aluminum and high-tech resin have created the need for extraordinary and flexible form-in-place gaskets. The Right Stuff® offers superior performance, even in today's complex vehicles.

The Right Stuff® and other Permatex® gasket maker products are available at leading automotive retailers and jobbers throughout the world.

## New Online Training

Build or repair it RIGHT, the first time!  
Make "Come Backs" a thing of the past by using premium quality RTV silicone gasket makers and liquid threadlockers.

Permatex® presents two brief training videos. See how the Right Stuff® Instant Gasket Maker replaces any cut gasket... with no down time waiting for cure! Learn how threadlockers help you put an end to loosening, corrosion and leakage in metal-to-metal applications.

# A True TWIST in Threadlocking!

## Permatex® Threadlocker Gels in the GEL TWIST™ Applicator.

No Drips, No Globbs, No Mess, No Waste...  
No Problem!

Now, with the Permatex® GEL TWIST™ pinpoint applicator, you can apply product precisely where you want it! Ideal for "hard-to-reach" applications, Permatex® Medium Strength BLUE Gel or High Strength RED Gel Threadlockers will lock threads without dripping or running, even on vertical applications!

Permatex® Threadlocker Gels provide "liquid quality" reliability without the problems. No drips.

No globbs. No mess. No waste.

Try Permatex® Threadlocker Gels today and give them a twist!

# tech tips

## **Disc Brake Service: How to prevent the squeal and make the job easier.**

**You've been there before** – your customer comes back complaining about squeaky brakes and you're stuck with another rework. No matter what you do, it's a lost cause all around – comebacks shake customer confidence and cut into your productivity and profits.

Next time, choose a more advanced brake lubricant, one that can handle the heat and last as long as the pads.

With **Permatex® Ceramic Extreme Brake Parts Lubricant** you can prevent disc brake squeal and chatter, and at the same time, protect caliper pins, sleeves,

bushings, and pistons against seizing and galling, so assembly and disassembly are easier.

This new lubricant can do the job under the most adverse braking conditions, right up to temps of +2800°F. It has a non-melting, 100% synthetic formulation with ceramic solids that will last longer and easily outperform ordinary caliper greases and traditional disc brake quiet products.

Permatex® Ceramic Extreme Brake Parts Lubricant is compatible with internal/external brake rubber and plastic hardware, including ethylenepropylene rubber, so you can use it with confidence.

Available in a 2-pack of 7 gram squeeze pouches (#24124) and an 8 fl. oz. bottle with a convenient, built-in application brush (#24125).

## **Threadlocking: How to put an end to loosening and corrosion of fasteners.**

**You've been there before** – you tighten a nut to the proper torque but then find later it has loosened. So you try a washer, or any of the various types of “lock washers”, and it still comes loose. Not only that, but corrosion has started to occur on the threads making the nut very difficult to remove.

Next time, choose the latest in threadlocking technology, one that ensures the nut won't come loose AND prevents thread corrosion.

With **Permatex® Threadlocker Gels in the GEL TWIST™ applicator**, you can apply threadlocker precisely where you want it. The patented pin-point applicator with extended nozzle allows for easy application in “hard-to-reach” areas. Just twist the dial and the gel works its way directly to where you need it.

The handy-sized **GEL SQUEEZE™ precision applicator** is also available for smaller applications.

The newest additions to the large family of Permatex® Threadlockers, the gel formulas are available in Medium Strength BLUE (#24010 & 24005) and High Strength RED (#27010 & 27005) making them ideal for vertical or overhead applications. By using either liquid or gel, all of the loosening and thread corrosion issues can disappear.

Try Permatex® Threadlocker Gels today and *give them a twist....or squeeze!*
