

# Extend Service Life of Bulbs, Lamps & Electrical Connectors!

## Permatex® Dielectric Grease in a New 3 oz. Power Can!

With hundreds of electrical connections in the average car, dielectric grease helps keep those connections corrosion-free and working at their best. Lights become brighter, bulbs last longer and connections do not corrode together. Whether it's your car, truck, motorcycle, RV or boat, dielectric grease is the right product to ensure trouble-free electrical connections.

Now available in our easy-to-use Automatic Tube®, Permatex® Dielectric Grease is able to reach into the tightest of work areas. Plus, with its unique dispensing method, the dielectric grease goes precisely where you need it (and not where you don't).

This 3 oz. can provides enough dielectric grease for the largest wiring jobs or provides clean storage when you only need a little bit. The can is designed specially to sit on a shelf...out of the way of tools that can crush a tube. Just another way that Permatex® is helping you work smarter and cleaner.

Dielectric grease protects electrical connections from moisture, salt, dirt and corrosion. It increases performance and extends the service life of bulb sockets and prevents voltage leakage around electrical connections. It's also a great lubricant and protective coating for rubber, plastic, ceramic and metal surfaces.

**Permatex®**

# Permatex® Dielectric Grease — New 3 oz. Power Can!

Dielectric Grease

Apply Permatex® Dielectric Grease to ceramic part of spark plug.

## Directions for Use:

### For connectors and battery terminals:

1. Make sure ignition is off.
2. Clean surfaces with appropriate cleaner such as Permatex® Brake & Parts Cleaner or Battery Cleaner.
3. Coat both parts with grease.
4. Reassemble maintaining metal-to-metal contact.

### For spark plug boots:

1. Make sure ignition system is off.
2. Remove heavy grease, dirt or oil with a clean rag.
3. Coat inside of spark plug boot with a thin layer of grease.
4. Coat ceramic part of plug.
5. Snap boot onto plug. Make sure fit is tight.

## Typical Applications:

- headlamps • light sockets; lighting for instrument panel, glove compartment, inside door trim, interior lights, parking and turn signals, brake lights, license plate lights, indicator lights, trunk and hood lamps and trailer hitches
- fuses • battery terminals • ignition components
- distributor caps • spark plug boots • other electrical connections

## Merchandising:

This compact blister card is specially designed to allow product to be hung, binned or displayed freestanding.
