

# Easy Cleanup...Easier on the Environment!

## PermaSorb™ Multi-purpose Cellulose Absorbent

**A cleanup product that is safe for you and the environment.**

Cleaning up spills is a way of life around the home, workshop, and garage. Now with PermaSorb from Permatex, spills can be cleaned up effectively without harming the environment.

### It's Safe to Use

PermaSorb is wood cellulose fiber obtained from the paper making process. It contains no chemicals so it's all natural, unlike other absorbents that contain silica dust, which can be a respiratory hazard for users.

### It's Fast and Easy to Use

PermaSorb is lightweight making it easy to apply, and it is several times more absorbent than clay litters typically used to clean up spills, making it comparable on a cost per use basis. And unlike clay, PermaSorb begins absorbing on contact, promoting faster spill containment and clean up.

### It's Smart to Use

But PermaSorb's greatest advantage is its environmentally friendly properties. Having passed the rigorous standards of Environmental Protection Agency (EPA) testing, when disposed in a landfill, PermaSorb will not result in absorbed contaminants leaching into the soil. This helps ensure the safety of our soil and ground water. You can be confident that you're not only operating efficiently but responsibly too.

**Permatex®**

# PermaSorb™ Absorbent

## Permatex® PermaSorb™ Multi-purpose Cellulose Absorbent

You're going to use some sort of absorbent anyway. Why wouldn't you use a product that's safer for you, your users and the environment?

### ABSORBS

- Oil
- Coolant
- ATF Fluid
- Brake Fluid
- Paint
- Solvents
- Water

### EFFICIENCY

- Several times more absorbent than clay
- Absorbs on contact
- Complete sheen removal
- Lightweight
- Will not leach
- Easy to handle

### SAFETY

- 100% Reclaimed cellulose fiber
- Non-toxic
- No silica
- Non-abrasive
- Incinerable to less than 1% ash\*
- Landfill safe\*
- Biodegradable

\*Cellulose absorbents are preferred by waste management professionals. Always dispose saturated absorbent in accordance with local, state and federal regulations.

**DIRECTIONS:**

1. Create a dam of PermaSorb around spill. Then completely cover spill with PermaSorb.
2. With a stiff floor brush, begin sweeping PermaSorb part way into the spill; topple back and forth. Continue in all directions until spill is completely absorbed. Sweep aside.
3. Lightly re-apply clean PermaSorb and swirl/sweep over the area to remove any remaining residue.
4. Sweep up completely and dispose according to local, state and federal regulations\*.

### SUGGESTED APPLICATIONS

- Garage floors
- Shop floors
- Driveways
- Sidewalks

\*The handling, storage and disposal of absorbed material is subject to the same procedures and precautions applicable to the original fluid. Dispose of according to local, state/provincial and federal regulations. Responsibility for compliance with all regulations is the sole responsibility of the user.
