

An RTV that withstands the harsh Gear Oil environment!

Permatex® Gear Oil RTV Sealant

Unique operating conditions need a unique sealant.

Permatex Gear Oil RTV Sealant is a silicone specially formulated to withstand the harsh gear oil environment found in differentials and transfer cases. Friction modifiers typically found in gear oil can break down other silicone formulas.

Meets OEM Specifications

Proven to meet the demanding standards of OE manufacturers, Gear Oil RTV can be used as a sealant for the differential case or as a gasket for the drain plug. It can withstand weathering, it retains leakproof sealing and it will not void manufacturer warranty requirements.

Safe To Use

Gear Oil RTV is sensor safe, non-toxic, non-flammable and low odor so it doesn't present a hazard to users. Specifically designed for use on transfer cases and differentials, it offers users the added assurance that they have the right product for the job.

As an automotive gasketing leader, Gear Oil RTV illustrates Permatex' understanding of the needs of the market and the ability to provide value added solutions.

Benefits

- Ensures Transfer Case Retention of Gear Oil
- Withstands Gear Oil Friction Modifiers
- Provides Leakproof Sealing
- Use as a Sealant or Gasket
- Non-toxic, Non-flammable
- Low Odor
